

## Naturopathic Care Now Available at ZoomCare Clinics

**Naturopathic care coming to Hawthorne and Alberta clinics starting April 22**

*By: ZoomCare*

April 22, 2013 -- ZoomCare, the innovative healthcare company that is building the world's first neighborhood clinic and smart phone-based healthcare delivery system, has launched Naturopathic services at its Hawthorne [3325 SE Hawthorne] and Alberta [1400 NE Alberta] clinics.

This innovative service combines ZoomCare's same-day, no-wait, affordable care model with holistic Naturopathic treatment. ZoomCare's Naturopathic practice focuses on acute illness, injury and preventive care, and integrates traditional medical wisdom with the most up-to-date advances in biomedical and diagnostic science.

The Naturopathic practice maintains a focus on addressing the underlying cause of a disease state. ZoomCare Naturopathy's goal is to educate and empower patients to improve their health, identify and remove obstacles to cure, and create optimum conditions for allowing the body to rebuild and heal.

Patients seeking a holistic approach to medicine may be offered nutritional recommendations, vitamins and supplements, botanicals (herbs), lifestyle modification counseling (sleep, stress, physical activity, etc.) and pharmaceuticals.

Some key facts that create the ZoomCare Naturopathy difference:

### **Convenient Hours and Locations:**

- The ZoomCare Hawthorne clinic will have same-day, no-wait Naturopathic services available Tuesday, Wednesday and Thursday from 12 PM to 5 PM.
- The ZoomCare Alberta clinic will have same-day, no-wait Naturopathic services available Monday and Friday from 12 PM to 5 PM.

**Fair, Flat Price:** ZoomCare's fair, flat pricing is now available for Naturopathic care. Insured customers pay their co-pay.

**A Focus on Wellness:** ZoomCare's Naturopathic offering is led by a board-certified provider who has deep experience in clinical research and integrative therapies and coauthored numerous research articles on diabetes and other illnesses.

**Personalized Care:** Patients receive dedicated one-on-one sessions with a boardcertified Naturopathic provider. "This is not your traditional Naturopathic clinic," said Dave Sanders, MD, Co-founder and Co-CEO. "We took the best of ZoomCare's on-demand, patient-centric model and applied them to our Naturopathic practice, making holistic care for acute problems accessible and affordable to our East Side neighbors. Essentially, we Zoomified Naturopathic medicine."
